Environmental Management Program

Our global environment, health and safety (EHS) management principles ensure that all Zoetis sites achieve and maintain consistently high levels of EHS performance. These principles are set globally and implemented locally across functions. Each of our manufacturing, R&D and logistics sites are required to implement the Zoetis EHS management system, as defined by our EHS Policy Standard, and to continue to advance it over time. Our sites complete periodic self-audits, checklists and inspections, and review applicable environmental requirements at least annually to ensure compliance with environmental laws and regulations. To ensure adherence to our EHS management system, we also conduct corporate audits of our operating sites.

In addition, Zoetis has multiple cross-functional governance committees that help ensure we adhere to environmental requirements and emerging regulations. These include our Enterprise Risk Management Committee, Pharmaceuticals in the Environment (PiE) Committee, Evolving Regulations Committee, Chemical Regulatory Monitoring Committee and Biotherapeutic Community of Practice Committee, among others.

Key aspects of our EHS management system include:

- Compliance Management
- Environmental Aspects and Impact Analysis
- Objective Setting
- Competency and Training
- Employee Engagement and Communications
- Management of Change
- Monitoring
- Emergency Preparedness
- Self-Audit

One of our sites is certified to ISO 14001 standards: Catania, Italy. The Suzhou, China, location was sold as part of our MFA divestiture.
