

California Voluntary Carbon Markets Disclosure

Assembly Bill 1305

The Voluntary Carbon Market Disclosures Act, Assembly Bill 1305, requires entities doing business in California to disclose specified information regarding the marketing, sale, purchase, or use of certain voluntary carbon offsets, as well as claims of net zero achievement, carbon neutrality or significant greenhouse gas (GHG) emissions reductions.

As the world's leading animal health company, Zoetis has formalized our sustainability aspirations in our Driven to Care strategy, which includes the following climate-related aspirations:

- Become carbon neutral in our own operations by the end of 2030
- Source 100% renewable electricity by the end of 2030

We report progress towards these aspirations on an annual basis. These reports and other statements regarding our Driven to Care sustainability strategy are available on the [sustainability report center of our website](#). Our climate-related aspirations and reported progress are based on our GHG data, which is calculated using the World Resources Institute (WRI) and World Business Council for Sustainable Development (WBCSD) Greenhouse Gas Protocol Standards as a basis and covers global operations. Additional information regarding our climate-related aspirations, progress to those aspirations and GHG emissions data can be found in our [2025 Sustainability Report](#). Our 2025 Scope 1 and Scope 2 emissions were subject to independent third-party assurance; no other independent third-party verification of data or claims has been obtained.

This disclosure is being provided in relation to the California Voluntary Carbon Market Disclosures Act and speaks only as of June 4, 2026. We undertake no obligation to update any information or statements contained in this document as a result of new information, figures, events or otherwise, except as required by law.
